Antitrust Policy

All meeting participants should constantly bear in mind that under no circumstances should these meetings be used as opportunities to discuss with any competitors' or suppliers' personnel prices or terms or conditions of sale or any other topics which may involve you or your company in any dangers or risks of violation of the United States Antitrust and Trade Regulation Laws.

It is especially important that no such discussions should take place at informal sessions either before or after the scheduled meetings.

Please review the NFDA Antitrust Guidelines and/or consult with legal counsel for specific guidance along these lines.

NFDA ANTITRUST GUIDELINES

The antitrust laws prohibit agreements or understandings between two or more businesses to regulate prices or quantities of goods or services, to allocate customers or territories, to hinder or limit a competitor or potential competitor's operations or otherwise unreasonably to restrain business activity. Discriminatory pricing or servicing is also prohibited.

Violation of these laws can be costly and dangerous, involving possibly going to jail and heavy fines. The following rules are not complete. They highlight the more common problems, but other activity can be illegal. Any activity involving agreement or joint action with your competitor should be a red flag for you to be cautious.

DO NOT discuss or exchange information regarding your prices or competitor's prices with a competitor (except when buying from or selling to him, and then only those specifics).

DO NOT discuss or exchange information with competitors which might affect prices, such as price differentials, discounts, margins, costs or terms of sale.

DO NOT agree with competitors to uniform terms of sale, warranties or contract provisions.

DO NOT agree with competitors to divide customers or territories

DO NOT discuss your customers with your competitors.

DO NOT act jointly with one or more competitors to put another competitor at a disadvantage.

DO NOT try to prevent your supplier from selling to your competitor.

DO NOT discuss your future pricing, marketing or policy plans with your competitor.

DO NOT discuss bids or procedure for responding to bids. NEVER make courtesy bids.

DO NOT boycott or refuse to deal with any supplier or customer.

DO NOT discuss any subject with a competitor which affects competition.

OBJECT to any improper discussions in your presence. If they persist, LEAVE.

Follow these rules wherever you are, whether at a formal meeting, a social gathering, on the golf course or in an elevator.

REMEMBER, you must avoid even the appearance of antitrust violations. Say or do nothing from which anyone could believe or even suspect a conspiracy to restrain trade.

Conflict of Interest Policy

This Conflict of Interest Policy of the National Fastener Distributors Association (1) defines conflicts of interest; (2) identifies classes of individuals within the Organization covered by this policy; (3) facilitates disclosure of information that may help identify conflicts of interest; and (4) specifies procedures to be followed in managing conflicts of interest.

1. Definition of conflicts of interest. A conflict of interest arises when a person in a position of authority over the Organization may benefit financially from a decision he or she could make in that capacity, including indirect benefits such as to family members or businesses with which the person is closely associated. This policy is focused upon material financial interest of, or benefit to, such persons.
2. Individuals covered. Persons covered by this policy are the Organization's officers, directors, chief employed executive and chief employed finance executive.
3. Facilitation of disclosure. Persons covered by this policy will annually disclose or update to the Organization President on a form provided by the Organization their interests that could give rise to conflicts of interest, such as a list of family members, substantial business or investment holdings, and other transactions or affiliations with businesses and other organizations or those of family members.
4. Procedures to manage conflicts. For each interest disclosed to the Organization President, the President will determine whether to: (a) take no action; (b) assure full disclosure to the Board of Directors and other individuals covered by this policy; (c) ask the person to recuse from participation in related discussions or decisions within the Organization; or (d) ask the person to resign from his or her position in the Organization or, if the person refuses to resign, become subject to possible removal in accordance with the Organization's removal procedures. The Organization's chief employed executive will monitor proposed or ongoing transactions for conflicts of interest and disclose them to the Organization President in order to deal with potential or actual conflicts, whether discovered before or after the transaction has occurred

Supply Chain Solutions

When You're Looking for Savings, Don't Attack the Pocket, Attack the Opportunity

Elevated Service • Expanded Warehouses • Distribution Support

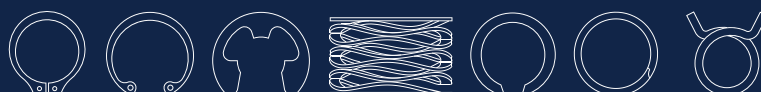

Product availability, quality and competitive pricing form the foundations of successful partnerships. We not only offer a diverse array of retaining rings, wave spring and hose clamps, but also a host of services and solutions that help us build long-lasting relationships with our customers.

Our commitment to service and delivery makes us the preferred sourcing partner worldwide. Whether your customers can use one of our 20,000 standard parts, or require a custom solution, our team focuses on providing supply chain solutions.

- ® Only manufacturer of every ring style (tapered, constant, spiral)
- ® Global production, warehousing, and support
- ® New technical service and sales teams
- ® Thousands of parts stocked and ready to ship
- ® Vertically integrated manufacturing process for tight controls on processes and timelines
- ® ISO 9001, ISO 14001, IATF 16949, AS9100, ISO 13485

J.LANFRANCO

LOCKNUTS FOR CRITICAL BOLTED JOINTS

MISSION CRITICAL BOLTING SOLUTIONS

#4 - 2" 1/2 | M1.2 - M60

jlanfranco.com

Non-destructive, Precision Self-Locking Fastener Technology

Information from J.Lanfranco Fastener Systems North America says, "Our goal is to provide you with the highest performance all-metal fasteners, knowledgeable advice and timely technical assistance—whatever your industry and whatever the project size." J. LANFRANCO manufactures locknuts for safety and mission critical applications and is ISO 9001:2015 certified and registered under the Fastener Quality Act. LANFRANCO locknuts are depended on across industries like railroads, oil & gas, energy, compression, mining and defense. Over forty years of service proven performance continue to demonstrate clear results: vastly improved performance and durability, less maintenance and fewer service interruptions.

A recent doubling of production capacity and investment in new machines now allows Lanfranco to produce self-locking nuts from M1.2 – M60, as well as a full Imperial line from #4- 2"1/2. Materials include carbon steel, stainless steel A2-70/A4-80 and a large variety of exotics. Additional advancements in surface treatments and design also now include a complete anti-galling solution for stainless steel nuts.

Lanfranco locknuts employ an all-metal design made of a single unique material that requires no insert. It derives its prevailing torque from two radially de-pitched locking slots positioned turret portion of the nut. The locking slots are opened by the bolt threads and apply precise and controlled locking torque directly on the thread flank. This locking form resists all forms of dynamic and cyclical vibration without damaging the bolt threads and ensures no galling during installation. This results in extremely consistent clamp forces using standard bolts and tools.

Lanfranco has its main production located in France (J.Lanfranco et Cie) with stocking subsidiaries and partners throughout the world. The North American market is served by two warehouses in Canada and the USA and will begin limited USA production in Q2 2023.

GOEBELTM
Fasteners Inc.

THE LEADING RIVET SOURCE

ABOUT US

Goebel Fasteners is a leading manufacturer of blind rivets, rivet nuts, and tooling systems for a wide range of industries.

WHY CHOOSE GOEBEL?

Goebel Fasteners is your trusted brand in the industry that provides quality products, excellent customer service, and innovative solutions.

QUALITY PRODUCTS • COMPETITIVE PRICING • FREE SHIPPING

FASTENER TRAINING WEEK

AUGUST 19-23, 2024 | CHICAGO, IL

ACCELERATED TRAINING FOR THE FTI CERTIFIED FASTENER SPECIALIST™ (CFS) DESIGNATION

Fastener Training Week features case studies, learning labs, interactive exercises and quizzes to reinforce learning taught by leading industry experts. The content includes manufacturing processes, consensus standards, quality control and includes a day of plant tours of manufacturing, secondary processes and testing facilities.

Instead of seven separate one-day classes, Fastener Training Week offers five intensive days of education and plant tours as part of the acclaimed FTI Certified Fastener Specialist™ (CFS) advanced technical training program. After completing this invaluable industry training in a small group environment and passing a final exam, attendees are eligible for the Certified Fastener Specialist™ (CFS) designation.

WHO SHOULD ATTEND?

- Fastener distributors
- OEMs
- Engineers
- Fastener manufacturers
- Buyers
- Quality assurance professionals
- End users
- Sales professionals

TOPICS:

- Thread and material specifications
- Process and dimensional specifications
- Quality assurance systems and specifications
- Lot traceability and test reports
- Print reading and tolerances
- Thread gaging and dimensional inspection
- Torque tension

Plant tours will take place on the third day of training.

“The CFS program drastically shortened my learning curve regarding fastener specifications. The program materials were well organized and professional. Each instructor was very knowledgeable and infused the lesson topics with real world examples. CFS is a great program taught by excellent instructors.”

“This course helped me gain a solid understanding of mechanical engineering and develop the technical knowledge important to this field. It also makes me realize the complexities and challenges we face, and that makes the work even more interesting”.
