

BUCKEYE FASTENERS DIN Rail

DIN Rail is the solution widely used in electrical installations for industrial control applications. Products, such as terminal blocks, contactors, timers are easily and efficiently mounted using DIN Rail.

ISO QUALITY ASSURED

DIN Rail at a Glance

Easy to Install | Standard 35mm x 7.5mm "Top-Hat" TS-35 | Low Carbon Steel | Zinc Plating | Corrosion Resistant
| Cut to Desired Length | Cost Effective Solution | EN 50022 | EN 60715

Value of DIN Rail

Saves installation time. Most DIN Rail devices are configured to snap onto the TS-35 with no issue. Associated devices can be mounted adjacent to one another, greatly reducing the needed amount of interconnected wiring. Devices can easily be removed from the rails, allowing for maximum flexibility within the enclosure system.
